

# Attic Insulation Rebate Schedule

Next to heat gain and loss through windows, ceilings make up the largest percentage of structural heating and cooling load for your home. While energy codes for new homes have required at least R-30 for over a decade, many existing homes still have lower than recommended levels of attic insulation, resulting in higher energy bills, larger heating and cooling loads, and reduced comfort. Adding additional attic insulation is one of the easiest and most cost-effective home efficiency upgrades you can make. Attic insulation can be installed by a professional insulation contractor or by a homeowner as a do-it-yourself project.

To encourage homeowners to upgrade attic insulation to recommended levels, Tri-County EMC offers the following rebates:

## Tri-County EMC Attic Insulation Rebate Schedule

<i>Existing Level</i>	<i>Recommended Level</i>	<i>Tri-County EMC Rebate</i>
R-0 to R-11	R-30	\$150
R-13 to R-19	R-30	\$90

- >> To qualify, the insulation must be installed after February 1, 2008.
- >> A Tri-County EMC representative will verify that the insulation was correctly installed to the stated level.
- >> Proof of purchase will be required.
- >> For more information or to apply for a rebate, contact a Tri-County EMC representative at 478.986.8118 or 1.866.254.8100, Ext 8118.

## Typical Insulation Material Values

<i>Insulation Type</i>	<i>R-Value/inch*</i>	<i>Average thickness to achieve R-30*</i>
Loosefill (blown) Cellulose	3.2 - 3.8	7.75" - 9.50"
Loosefill Fiberglass	2.2 - 2.7	11.0" - 13.5"
Loosefill Rock Wool	3.0 - 3.3	9.0" - 10"
Fiberglass Batts	2.9 - 3.8	8.0" - 10.5"
Spray-On Foam Polyisocyanurate or Polyurethane	7.0 - 8.0	3.75" - 4.25"

\* Insulation R-Values provided by the U.S. Department of Energy
